Hi all,

I got a couple slides from Mike Owens for Deseret, but I will need slides about the state and federal permitting programs. Who can help with that? Here's the outline Mike Koeber proposed:

- I. Overview of current air quality and challenges (wintertime ozone)
- II. Tribal interests
- III. CAA regulatory activities
  - a. State and federal permitting programs
  - b. Significant new source issues – e.g., Deseret
  - c. Proposed FIP for existing sources (VOC controls for ozone purposes)
  - d. Regional haze issues
- IV. NEPA activities

Thanks,

Jody

Just one clarification in the NEPA coordination...after talking with Monica this morning we decided it's best for Jody to coordinate w/ me on that topic.

Jody: I don't think there's much for us to coordinate on as I'll work with Phil on putting stuff together and we'll get you the info for the overall package.

Thanks,

Scott

Jody,

We've gotten a request from Mike Koerber with the OAR front office for a presentation on the Uinta basin. Here's the outline that he is proposing... I think we already have some canned material for several of these sections. Can you work with Chris R., Kyle, and our NEPA group to develop this presentation? The timing is up in the air at this point, but late June is probably when this will happen.

Thanks, and let me know if you have any questions.

-Chris

Scott – Sorry for not responding sooner to your voicemail about the Uinta briefing we requested. Here is an initial outline for your consideration. We can talk next week about this, as well as timing (later in June?).

- I. Overview of current air quality and challenges (wintertime ozone)
- II. Tribal interests

III. CAA regulatory activities

- a. State and federal permitting programs
- b. Significant new source issues – e.g., Deseret
- c. Proposed FIP for existing sources (VOC controls for ozone purposes)
- d. Regional haze issues

IV. NEPA activities

I'm sure I've left out something important here, so feel free to modify, as necessary.

Mike
